To whomsoever it may concern

This is to certify that we are using ROTODEL make rotary screw-gear pump model RDN-400-S capacity 40 M3/hr for Castor oil/ Furnace oil loading/ unloading and bottom clearing for our tanks. There are more than 10 pumps in use with us for last 10 years. We found that these pumps are performing most satisfactorily and we have never faced any problem with them. These pumps are very compact, efficient & most reliable. We also found that for critical application of bottom clearing and sludge transfer where other pumps could not perform well, this pump has performed satisfactorily. The after sales service is also prompt from the manufacturer.
